

Naibe Mehari Tekle

Full-Stack Developer · MSc Cybersecurity student

Norway · naibmehari@gmail.com · naibtech.dev · github.com/naibwedi · linkedin.com/in/naib-mehari-95690114a

PROFILE

Full-stack developer building Python/FastAPI backends, NLP pipelines and industrial .NET software. Completed a B.Eng. in Computer Engineering (University of Agder, June 2026) and now studying for a Master's in Cybersecurity. Independent projects include a speech-to-text studio for Tigrinya and Amharic, interpretable machine-learning research and an immersive 3D web experience.

EXPERIENCE

Full-Stack Developer

Jan 2026 – Present

Anzyz Technologies · Grimstad, Norway

- Develop and maintain full-stack solutions and backend services in Python, FastAPI, MongoDB, Celery and Elasticsearch.
- Work on document ingestion, processing and analysis, including NLP features that identify and visualise relationships between concepts and themes.
- Contribute integrations, testing, debugging, pull requests and production-ready improvements using asynchronous processing and REST APIs.

Software Engineer

Aug 2025 – Jun 2026

Red Rock · Kristiansand, Norway

- Contributed to an ADS parameter tool for industrial automation, built with C#, .NET 8, Avalonia and ReactiveUI (MVVM) and integrated with Beckhoff TwinCAT over ADS.
- Built symbol-tree navigation, parameter comparison, change highlighting, inline editing and JSON-based workflows.

ICT Service Technician Apprentice

Aug 2021 – Jun 2023

Vågsbygd videregående skole · Kristiansand, Norway

- Provided technical support to students and staff; installed, configured and maintained computers, software, networks and IT equipment.
- Troubleshoot hardware, software, account, access and network issues. Completed the apprenticeship (trade certificate in ICT service).

SELECTED PROJECTS

- **HabeshaVoice Studio** — Private speech-to-text workspace for Tigrinya and Amharic: Next.js app with authenticated API routes and a separate FastAPI inference service; recording, transcript review, search and export. [live app \(login\)](#)
- **Tsetlin Market Lab** — Interpretable-ML research pipeline (ingest, features, bake-off, report): Tsetlin Machine versus seven baselines, time-ordered leakage-safe splits, scheduled data collection with GitHub Actions. github.com/naibwedi/tsetlin-market-lab
- **Selam — A Sacred Journey** — Immersive 3D walk through an Eritrean Orthodox-inspired church in Three.js with guided tour, golden-hour and candlelight lighting, ambient sound and reduced-motion support. [live demo](#)
- **CampusCart** — Student marketplace (React Native, Firebase) with a serverless moderation pipeline: Google Cloud Vision screens uploads, deletes flagged images and notifies the seller. github.com/naibwedi/Campus-Cart-App
- **Logi-Track** — Logistics platform in ASP.NET Core with four roles, live trip updates over SignalR, Identity, EF Core, Swagger and Docker. github.com/naibwedi/Logi-Track
- **FlowLingo** — Android translation keyboard: native Kotlin input-method service with live translation preview and a Flutter settings and onboarding app. github.com/naibwedi/FlowLingo

SKILLS

Languages	Python, C#, TypeScript, JavaScript, C++, C, Dart, Kotlin
Backend & data	FastAPI, ASP.NET Core, Celery, MongoDB, Elasticsearch, PostgreSQL, SQLite, Entity Framework, SignalR
Frontend & mobile	React, Next.js, React Native, Expo, Flutter, Three.js, HTML/CSS
AI & ML	NLP, speech recognition (ASR), Tsetlin Machines, XGBoost, LightGBM, leakage-safe validation
Security	XSS exploitation, bcrypt, TOTP 2FA, OAuth2, brute-force protection
Industrial & desktop	Avalonia UI, ReactiveUI, MVVM, Beckhoff TwinCAT ADS
DevOps & tools	Docker, GitHub Actions, GitLab CI/CD, Vercel, Git

EDUCATION

Master's — Cybersecurity In progress	2026 – Present
B.Eng. Computer Engineering (Ingeniørfag – Data) University of Agder (UiA)	Aug 2023 – Jun 2026
IKT Servicefag (Vg2) · Elektrofag (Vg1) Sjøvegan vgs · Bardufoss vgs	2019 – 2021

CERTIFICATES & COURSES

Trade certificate (fagbrev), ICT service — Vågsbygd vgs · JavaScript Algorithms & Data Structures — freeCodeCamp · UX Design — Google (2021) · CompTIA Network+ course — Udemy (2021) · Web development — Domestika / Udemy (2020–2022)

LANGUAGES & OTHER

Norwegian, English, Tigrigna, Arabic · Driving licence class B · References available on request
